

FR1200

Product Description

FR1200 is an IP65 rated outdoor fingerprint reader with RS485 communication interface. It works ideally with biometric multi-door access controllers, such as inBIO Series, but also with standalone access control terminals, such as the F8. Essentially a slave reader, it captures and transfers fingerprint templates to the master panel for verification. With its safe communication protocol and rugged structure, FR1200 offers complete anti-vandal security and extra durability in all outdoor weather conditions.

Standard function

Optional function

Specifications

Hardware

CPU	324MHZ
Sensor	ZK Small-sized Sensor

Environment

Oper. Temp	0°-45°C
Oper. Humidity	20%-80%
IP Rating	IP65

Power

Power	12V, DC
-------	---------

Communication

Comm. Port	RS485
------------	-------

Dimensions

Dimensions	50x107x37mm (L x W x D)
Weight	0,12kg
